

Organic Poultry Litter

Bozrah, CT

PRODUCT INFORMATION:

Our Earthlife Poultry Litter is approved for Organic growing and is an excellent source of nutrients that can be incorporated into most fertilizer programs. Because of Poultry Litter's high nitrogen content, it has long been considered one of the most desirable nutrient sources to improve crop yields. In addition, Poultry Litter also supplies other essential plant nutrients and adds valuable organic matter which helps improve soil's moisture and nutrient retention. The key to successful use of Poultry Litter is to match the nutritional requirements of the crop with nutrients available in the Poultry Litter and supplemental fertilizers.

TESTIMONIAL:

"We have used Poultry Litter for more than 30 years on our corn and newly cleared ground, and found it to be an excellent additive to improve crop yield and for building soils."
